Summary

Junior Full-Stack Developer with hands-on experience in designing and building full-stack web applications, RESTful APIs, and distributed backend services. Strong background in ASP.NET, React, and Java, with experience in AI integration, real-time data processing, and IoT-driven systems.

Education

Kadir Has University, İstanbul, Turkey — *Sep 2021 – Jun 2026*
Bachelor of Science in Computer Engineering (English) — GPA: 3.28

Experience

Teknosa — *Oct 2025 - Present*
Information Technology Intern — İstanbul, Turkey

- Technical support and user system management in corporate IT environment.
- Device management, inventory tracking, troubleshooting, and IT infrastructure operations.

Lunova — *Sep 2025 - Feb 2026*
Full-Stack Developer - Volunteer Intern — Remote

- Addiction support platform with Django backend and TypeScript frontend.
- Developed role-based interfaces for experts, clients, and users with PostgreSQL database.
- Scalable architecture serving three frontends from one backend with Zoom integration.

Crs Soft — *Jul 2025 - Aug 2025*
Software Development Intern — İstanbul, Turkey

- AI-powered inventory system with ASP.NET Core, React, and Computer Vision.
- RESTful APIs with Entity Framework Core, JWT authentication, and ML algorithms.
- Multi-layered architecture with Ollama LLaVA model for product recognition.

Horizon Software Bilişim Teknolojileri — *Jul 2024 - Aug 2024*
Software Development Intern — İstanbul, Turkey

- Customer Management System with ASP.NET MVC and Entity Framework.
- Responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap.

Projects

Track Your Best – Smart Mobility Platform (Graduation Project - Ongoing): Full-stack GPS tracking system using ESP32, MQTT, ASP.NET Web API, PostgreSQL, and React (Next.js). Real-time location tracking and geospatial data processing. Source Code

AIVentory – AI-Powered Inventory Management (Personal Project): AI-powered product recognition using Ollama LLaVA model. Multi-layered architecture with role-based access control, Entity Framework Core, and Computer Vision features. Source Code

Rezal – Restaurant Reservation System (Group Project): Restaurant reservation API with multi-role authentication. RESTful APIs using Spring Boot, Spring Security, JWT authentication, and MySQL. Responsive React 18 frontend with role-specific dashboards. Source Code

Technical Skills

Programming Languages: C#, Java, JavaScript, Python, C, C++, PHP
Object-Oriented Development: OOP Principles, Layered Architecture, Design Patterns
Backend Technologies: ASP.NET Core, Spring Boot, FastAPI, RESTful APIs
Frontend & UI: JavaScript, React, Next.js, HTML, CSS, Qt
Databases: PostgreSQL, MySQL, MSSQL
Tools & Practices: Git/GitHub, Docker
Areas of Interest: AI and Machine Learning, Full Stack Development, IoT Systems
