SUMMARY

Junior Full-Stack Developer with hands-on experience in designing and building full-stack web applications, RESTful APIs, and distributed backend services. Strong background in ASP.NET, React, and Java, with experience in AI integration, real-time data processing. Additionally experienced in IT support and operations, including technical support, mobile device management, inventory tracking, and IT infrastructure management in corporate environments.

EDUCATION

Kadir Has University, İstanbul, Turkey

Sep 2021 – May 2026

Bachelor of Science in Computer Engineering (English)

GPA: 3.30

EXPERIENCE

Teknosa

Oct 2025 - May 2026

Information Technology Intern

İstanbul, Turkey

- Technical support and user system management in corporate IT environment.
- Device management, inventory tracking, troubleshooting, and IT infrastructure operations.

Lunova

Sep 2025 - Feb 2026

Full-Stack Developer - Volunteer Intern

Remote

- Addition support platform with Django backend and TypeScript frontend.
- Developed role-based interfaces for experts, clients, and users with PostgreSQL database.
- Scalable architecture serving three frontends from one backend with Zoom integration.

Crs Soft

Jul 2025 - Aug 2025

Software Development Intern

İstanbul, Turkey

- AI-powered inventory system with ASP.NET Core, React, and Computer Vision.
- RESTful APIs with Entity Framework Core, JWT authentication, and ML algorithms.
- Multi-layered architecture with Ollama LLaVA model for product recognition.

Horizon Software Bilişim Teknolojileri

Jul 2024 - Aug 2024

Software Development Intern

İstanbul, Turkey

- Customer Management System with ASP.NET MVC and Entity Framework.
- Responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap.

PROJECTS

Track Your Best – Smart Mobility Platform (Graduation Project): Full-stack GPS tracking system using ESP32, MQTT, ASP.NET Web API, PostgreSQL, and React (Next.js). Real-time location tracking and geospatial data processing. [🔗 Source Code](#)

AIventory – AI-Powered Inventory Management (Personal Project): AI-powered product recognition using Ollama LLaVA model. Multi-layered architecture with role-based access control, Entity Framework Core, and Computer Vision features. [🔗 Source Code](#)

Rezal – Restaurant Reservation System (Group Project): Restaurant reservation API with multi-role authentication. RESTful APIs using Spring Boot, Spring Security, JWT authentication, and MySQL. Responsive React 18 frontend with role-specific dashboards. [🔗 Source Code](#)

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript, Python, C, C++, PHP

Object-Oriented Development: OOP Principles, Layered Architecture, Design Patterns

Backend Technologies: ASP.NET Core, Spring Boot, FastAPI, RESTful APIs

Frontend & UI: JavaScript, React, Next.js, HTML, CSS, Qt

Databases: PostgreSQL, MySQL, MSSQL

Tools & Practices: Git/GitHub, Docker

IT & System Administration: Active Directory, Mobile Device Management (MDM), Xurrent, Microsoft Office, Help Desk Support, Computer Hardware

Areas of Interest: AI and Machine Learning, Full Stack Development, IT & Software Development
